Important Notice: Risks Associated with Investing in Bonds

When you invest in a bond, you are essentially lending money to the bond issuer.

One key risk is the issuer defaulting on its interest payments or principal repayment to you. Market, business, legal and regulatory risks may affect the issuer's ability to pay you the bond interest, or to repay the principal amount, for as long as you own the bond.

Other risks such as interest rate and market liquidity risks may affect the price that you can sell the bond for, or your ability to sell in the market if you choose to sell the bond before maturity.

Please read the section "Risk Factors" of the Offering Circular for a description of other key risks relating to the T2026-S\$ Temasek Bond. If you have further questions, please seek financial or other professional advice before you invest.

About Temasek

Incorporated in 1974, Temasek is a long term investment company headquartered in Singapore. Our Net Portfolio Value was S\$381 billion as at 31 March 2021, comprising assets in a range of countries and sectors.

Our Borrowings

We may issue new bonds from time to time, based on our requirements and market conditions.

We have issued bonds to institutional, accredited and other specified investors since 2005 primarily as a form of financial discipline. The increase and decrease of our credit spreads, especially relative to comparable issuers in the market, serve as public signals of potential changes in our credit quality.

As at 31 March 2021, our Total Debt¹ of S\$17.6 billion comprised S\$16.0 billion of Temasek Bonds and S\$1.5 billion of Euro-commercial Paper (ECP). The longer maturity Temasek Bonds had a weighted average maturity of over 16 years, while the shorter maturity ECP had a weighted average maturity of above two months.
